Dana,

I once again wanted to say thank you for donating the use of your sound system for the awards ceremony at this years 2008 CSCA Scholastic Championships this past weekend.

I have always wondered if there could ever be a way to get rid of the poor sound acoustics in that auditorium. With the concrete walls, floors, ceilings and the steel beams in that room I thought we might just have to deal with the reverberation noise forever.

When I walked into the room on Sunday to prepare for the awards ceremony and heard the music coming from the sound panels I was stunned. The clarity with of the music was absolutely astounding. I walked all over the auditorium to hear if the clearness was an illusion. To my surprise and great satisfaction every note and every instrument could be heard from every angle in the room.

I knew right then and there that this was one of the most exceptional sound systems I had ever heard.

Making it even more amazing was the space or should I say the lack of space which the entire system used. Sleek and very professional.

For every AV coordinator who has ever desired to have a sound system that would give clean, crisp and clear audio in every situation your new sound panel system is a must.

Thank you again for allowing us the opportunity to use the system at our awards ceremony.

Sincerely,

Tom Nelson
